

HowTo – solve QuickTime and Flash Problems

Since QuickTime 7.0 for Mac OS X there can be problems with Flash media content. That's because of the standard setting in System Preferences of QuickTime. As a standard Flash is deactivated.

To use Flash systemwide, you have to activate Flash in the System Preferences of QuickTime.

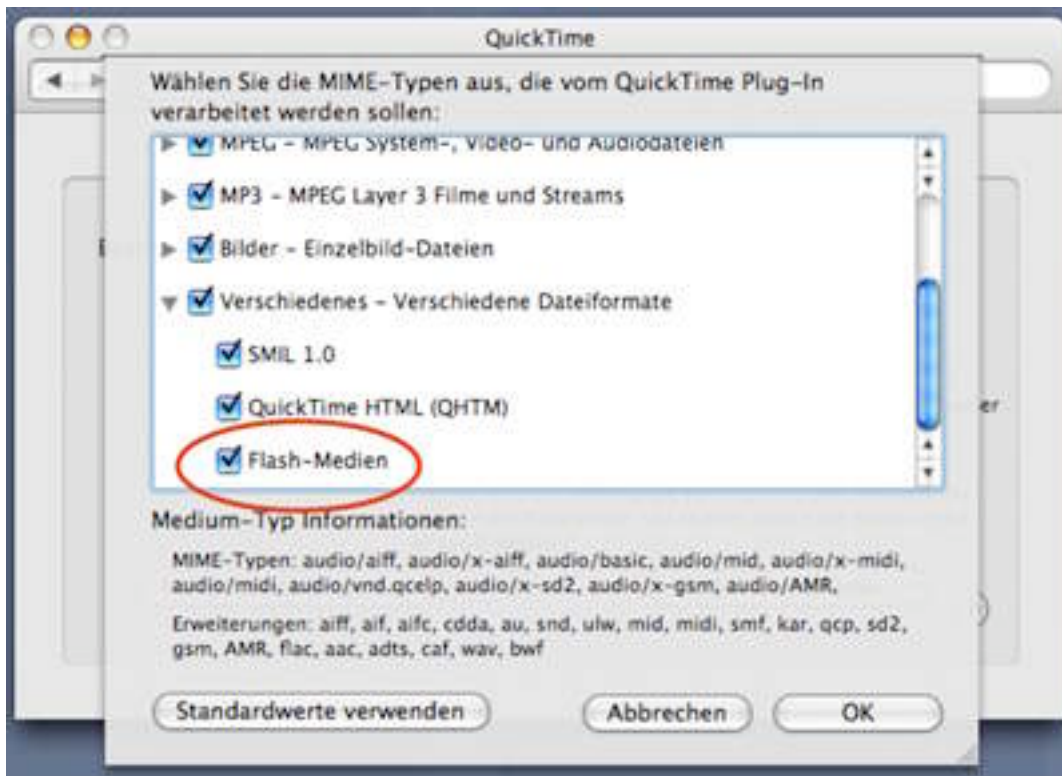

How to:

Go to System Preferences, choose QuickTime.
on right side click Advanced.
✓ Flash activated.

Open the MIME-Settings

»

Check Diverse below.
✓ activate Flash-Media.

Now all your SWF-Screensaver and Flash-Media will work again, now you can use Flash-Media in iMovie und FinalCut ...
